SAP

January 4, 2020

PALO ALTO, CA

Senior Data Scientist Opportunity

Dear SAP representative,

I am a research scientist with Criteo Research, working in Machine/Deep Learning/Optimization and am currently looking for applied/research based opportunities in Machine/Deep Learning and Data Science. I would love to be considered for roles with SAP.

Broadly my work encompasses applying different Machine Learning, Deep Learning and Nonlinear Optimization techniques to solve related potentially large scale problems. I completed my PhD in June, 2018 and joined Criteo Research subsequently. I have 7+ years of research experience (academic + industry) and 5 years of developer experience (industry). During this period, I have been exposed and worked on solving a variety of problems.

I believe that my qualifications would make me useful and allow me to contribute to SAP. I would like to thank you for your time and would appreciate hearing from your end so that we can talk further on this.

Sincerely,

Suchismit Mahapatra
