Suchismit **Mahapatra**

RESEARCH SCIENTIST · (MACHINE LEARNING | DEEP LEARNING)

Criteo AI Lab, 325 Lytton Avenue, Palo Alto, CA 94301

(+1) 716-435-8865 | suchismi@buffalo.edu | https://schrilax.github.io/ | suchismit | schrilaxs | suchismit

About Me

I am currently a Research Scientist with Criteo. Broadly, my work encompasses applying different Machine Learning, Deep Learning and Nonlinear Optimization techniques to solve related problems. I completed my PhD with the Machine Learning and Data Science Research (MLDS) group at The State University of New York at Buffalo (UB), working under Varun Chandola.

Research Interests

Broadly, my area of research is in large scale machine learning and data mining. Specifically my research focuses on designing, analyzing and implementing novel machine learning algorithms that take advantage of modern hardware to enable learning and mining of massive graphs and data sets. My research interests include :

- Machine Learning
- Deep Learning
- Nonlinear/Distributed Optimization
- Data Mining
- Parallel Computing
- Social Networks

Academic Background

University of Buffalo, The State University of New York *Buffalo, NY*

PH.D. IN COMPUTER SCIENCE AND ENGINEERING *September 2012 - June 2018*

- Thesis: Scalable Nonlinear Spectral Dimensionality Reduction (NLSDR) methods for streaming data.
- Advisors: Varun Chandola, Nils Napp & Jaroslaw Zola
- GPA: 4.0 out of 4.0 (Transcript)

University of Buffalo, The State University of New York *Buffalo, NY*

M.S. IN COMPUTER SCIENCE AND ENGINEERING *September 2010 - August 2012*

- Masters Topic: A Cold Start Recommendation System Using Item Correlation and User Similarity.
- GPA: 4.0 out of 4.0 (Transcript)
- Department rank: 1 out of 555

National Institute of Technology, Rourkela *Rourkela, India*

B.TECH. IN COMPUTER SCIENCE AND ENGINEERING *August 2001 - May 2005*

- Cumulative Score: 77% (First class with honors)(Transcript)
- Joint Entrance Exam Rank 22 out of 400,000

Honors

2017	Won a NSF Junior Researcher Award to attend CBMS Conference on Sparse Recovery 2017.	*Las Cruces, NM*
2016	Became a NVIDIA GPU Educator.	*Santa Clara, CA*
2015	Won a NSF Student Travel Award to attend IEEE Big Data 2015.	*Santa Clara, CA*
2013	Won a rare Research Assistant-ship covering my second year as a Masters student.	*Buffalo, NY*
2008	Won the Star Performer of the Month award in Cognizant.	*Kolkata, India*
2007	Won the Outstanding Newbie award in Cognizant.	*Kolkata, India*
2004	Scored 99 percentile in Zonal, Discipline and National categories of National IT Aptitude Test.	*Rourkela, India*
2004	Subsequently won a Bhavishya Jyoti Scholarship for above.	*Rourkela, India*
1999	Won the Young Genius award.	*Cuttack, India*

Skills & Proficiencies

Python, C/C++, TensorFlow, Scala, Hive, CUDA

Experience

Criteo AI Lab
Palo Alto R&D Center, CA

RESEARCH SCIENTIST — *July 2018 - Present*

- Improve Click-through and Sales prediction
  - Understanding how to improve Click-through and Sales prediction using nonlinear ML techniques.
- Theoretical aspects on Deep Learning (working with Noureddine El Karoui)
  - Working towards understanding kernel and manifold specific aspects of theoretical deep learning.

The Research Foundation for SUNY
Buffalo, NY

RESEARCH ASSISTANT — *January 2018 - May 2018*

- Parallelized Hierarchical Clustering (working with Haimonti Dutta)
  - Working towards developing a novel parallel random-partition based hierarchical clustering algorithm using activization strategies.
- Kernel Manifold Learning (working with Varun Chandola)
  - Working towards developing Manifold Learning techniques motivated from Gaussian Processes. 📄

Criteo AI Lab
Palo Alto R&D Center, CA

RESEARCH SCIENTIST INTERN — *September 2017 - December 2017*

- Efficient Domain Adaptation (working with Suju Rajan)
  - Understanding how to efficiently deal with the Domain Adaptation problem from an Optimal Transportation perspective.

Criteo AI Lab
Palo Alto R&D Center, CA

RESEARCH SCIENTIST INTERN — *May 2017 - August 2017*

- Joint Cross-domain Query-Product modeling using Adversarial Transfer Learning (working with Suju Rajan)
  - Trying to learn a robust Query-Product model across retailer domains using Adversarial techniques in Deep Transfer Learning. 📄

The Research Foundation for SUNY
Buffalo, NY

RESEARCH ASSISTANT — *January 2017 - May 2017*

- Representation learning via Deep learning/NLSDR methods (working with Varun Chandola / Nils Napp / Jaroslaw Zola)
  - Understanding complex nonlinear processes using Deep Learning/NLSDR methods. ▶️▶️
- Incorporating complex constraints for sparse Logistic Regression (working with Varun Chandola)
  - Working towards solving the problem of including graphical and/or tree-based hierarchical constraints in sparse Logistic Regression.

University of Buffalo, The State University of New York
Buffalo, NY

TEACHING ASSISTANT — *September 2016 - December 2016*

- Teaching Assistant for CSE 574 Machine Learning.

BD Biosciences
San Jose, CA

MACHINE LEARNING ALGORITHM DESIGN INTERN — *June 2016 - August 2016*

- Fast Clustering of Flow Cytometry data
  - Scaled up the existing framework for clustering of high dimensional Flow Cytometry data upto ~16x. 📄📄

University of Buffalo, The State University of New York
Buffalo, NY

TEACHING ASSISTANT — *January 2016 - May 2016*

- Teaching Assistant for CSE 574 Machine Learning.

University of Buffalo, The State University of New York
Buffalo, NY

RESEARCH ASSISTANT — *June 2013 - December 2015*

- Nonlinear Spectral Dimensionality Reduction (working with Varun Chandola / Jaroslaw Zola / Nils Napp)
  - Developing scalable Nonlinear Spectral Dimensionality Reduction methods in a streaming setting.
- Social Network Modeling (working with Varun Chandola)
  - Developed the xKPGM model for social network modeling.
- Variance Reduction techniques in Distributed Optimization (working with Haimonti Dutta / Varun Chandola)
  - Working towards developing novel variance reduction techniques for the empirical risk minimization problem.
- Understanding Rumor Propagation in Social Networks (working with Shambhu Upadhyaya / Varun Chandola)
  - Working towards modelling rumor propagation in social networks.
- Volcanic Flow Prediction (working with Abani Patra / Varun Chandola / Paul Bauman)
  - Developed a Gaussian process based model for prediction of flow using GPGPUs.

University of Buffalo, The State University of New York
Buffalo, NY

TEACHING ASSISTANT — *September 2012 - May 2013*

- Teaching Assistant for CSE 510 Introduction to Robotic Algorithms.

The Research Foundation for SUNY   *Buffalo, NY*
Research Assistant   *June 2011 - August 2012*

- Localization Via Entropy Reduction (working with Robert Platt)
  - Developed an active localization technique via sequential reduction of entropy using OpenRAVE/ROS. 📄▶️

- AIRS (working with Rakesh Nagi)
  - Developed sequential and parallel versions of TRUncated Search Tree (TRUST) using HBase, Hadoop Sequence Files and RDF.

- Name2Face (working with Bina Ramamurthy)
  - Developed Name2Face, a cloud application consuming the Microsoft cloud services (blob, queue and table).

Cognizant   *Kolkata, India*
Associate   *June 2005 - July 2010*

- Developed ExProc, a tool for processing excel documents.
- Built SuperAgent 4.0, a tool for making reservations which interacts with the Novasol and Cuendet servers.
- Developed Universal Agent Tool along with my team, a tool which aimed at merging operations for various CRS.
- Contributed to a white paper Using Venn Diagrams to capture Business Requirements.

Publications

1. Modeling Graphs Using a Mixture of Kronecker Models. **Suchismit Mahapatra** and Varun Chandola. Proceedings of the 3rd IEEE International Conference on Big Data, 2015. 📄

2. Error Metrics for Learning Reliable Manifolds from Streaming Data. **Suchismit Mahapatra**, Frank Schoeneman, Varun Chandola, Jaroslaw Zola, Nils Napp. Proceedings of SIAM Data Mining Conference, 2017 📄

3. S-Isomap++: Multi Manifold Learning from Streaming Data. **Suchismit Mahapatra** and Varun Chandola. Proceedings of 5th IEEE International Conference on Big Data, 2017 📄

4. Learning Manifolds from Non-stationary Streaming Data. **Suchismit Mahapatra** and Varun Chandola. (In submission) 📄

5. A Generalized Out-of-Sample Extension Framework for Streaming NLSDR. **Suchismit Mahapatra** and Varun Chandola. (Under preparation)

Seminar/Symposia

2017	S-Isomap++: Multi Manifold Learning from Streaming Data. (IEEE Big Data 2017) 📄	*Boston, NY*
2017	Error Metrics for Learning Reliable Manifolds from Streaming Data. (SIAM SDM 2017) 📄	*Houston, TX*
2016	Error Metrics for Learning Reliable Manifolds from Streaming Data. (UB Computer Science Mixer) 📄	*Buffalo, NY*
2016	Fast Clustering of Flow Cytometry Data via Adaptive Mean Shift. (BD Biosciences) 📄	*San Jose, CA*
2015	Modeling Graphs Using a Mixture of Kronecker Models. (IEEE Big Data 2015) 📄	*Santa Clara, CA*
2012	Entropy-based localization framework for localizing known objects. (NEMS 2012) ▶️	*Bedford, MA*

Activities

- Part of organizing committee for KDCloud [2014], BigSpatial [2014, 2015, 2016, 2017].

- Student Member of IEEE, SIAM and ACM.

Additional Coursework/Projects

- Implemented 3PRR Parallel Chain and PRRR Serial Chain Manipulators under Venkat Krovi. 📄📄📄

- Developed ElGooG – A search engine using ~100000 TREC documents as corpus (won the NTipS 2010 competition). 📄

- Machine Learning course offered by Stanford under Dr Andrew Ng. 📄

- Optimization/Mathematics courses offered by Coursera. 📄📄
